Hiring Committee
CF Private Equity
New York, NY and Norwalk, CT

Dear Hiring Committee,

I am writing to express my interest in the Analyst, Venture Capital position at CF Private Equity. As a Master's candidate in Statistical Science at Indiana University Bloomington, I have developed a strong foundation in quantitative analysis, computational statistics, and evidence-based decision-making. I am especially drawn to the opportunity to contribute to a venture capital team that evaluates early-stage opportunities, supports manager due diligence, and applies disciplined analytical rigor to investment decisions.

My interest in financial markets extends beyond the technical side of analysis to a broader fascination with how investment capital is deployed, value is created, and long-term wealth is built. I am particularly interested in investment markets and wealth management because they combine analytical rigor with strategic judgment, and I am eager to develop my career in an environment where data, markets, and decision-making intersect. This perspective has strengthened my interest in private markets and in understanding how thoughtful investment decisions can create sustainable value for clients and institutions.

In my current role as a Research Assistant in the StatMIND Lab, I work on high-dimensional data analysis and computational benchmarking. I have implemented Bayesian modeling routines in C++ using Rcpp and RcppArmadillo, reproduced original R package outputs, and validated results through unit testing and runtime benchmarking. This work has required careful attention to accuracy, reproducibility, and performance, and the skills I developed align closely with the diligence, portfolio monitoring, and analytical responsibilities described in this role. I also built benchmarking workflows to compare runtime and scalability across implementations, which strengthened my ability to evaluate tradeoffs and present findings in a clear, decision-oriented way.

Beyond my research experience, my work as a Teaching Assistant and Senior Mathematics Instructor has strengthened my communication, organization, and problem-solving abilities. I have taught and mentored more than 100,000 students, translating complex ideas into structured explanations and helping learners build confidence in difficult quantitative material. That experience has reinforced my ability to work independently, manage multiple priorities, and communicate clearly with different audiences, qualities that are critical in a fast-paced investment environment.

I am particularly interested in CF Private Equity because of its long-standing focus on venture capital and private markets, as well as its emphasis on thoughtful manager selection and disciplined investment process. My statistical training, computational skill set, and growing interest in investment markets and wealth management position me to contribute meaningfully to your venture capital team. I would welcome the opportunity to bring my analytical rigor, curiosity, and commitment to action to CF Private Equity.

Thank you for your time and consideration. I would be grateful for the opportunity to discuss how my background and interests align with your team's work. I look forward to the possibility of speaking with you.

Sincerely,

Nahid Hasan Sagar
