Hiring Committee
Hoosier Energy
2501 South Cooperative Way
Bloomington, Indiana 47403

Dear Hiring Committee,

I am writing to express my interest in the Financial Analyst I position at Hoosier Energy. I am currently pursuing a Master of Science in Statistical Science at Indiana University Bloomington, where I have developed a strong foundation in quantitative analysis, data interpretation, and decision support. My background in statistics and data analysis, combined with my interest in applied financial work, aligns well with Hoosier Energy's mission to support reliable and efficient utility operations through strong accounting and finance practices.

My academic training has emphasized analytical rigor, structured problem solving, and clear communication. In my current role as a Research Assistant in the StatMIND Lab, I work with large, complex datasets and build reproducible workflows to validate results, benchmark performance, and summarize findings for technical stakeholders. This experience has strengthened my ability to work with data carefully, identify inconsistencies, and communicate conclusions in a precise and actionable way. I have also developed a strong appreciation for financial reporting and operational analysis through the disciplined thinking required to evaluate data quality, trends, and decision-ready insights.

In addition to my research experience, my role as a Teaching Assistant and Senior Mathematics Instructor has helped me build the communication, organization, and professionalism needed in a collaborative work environment. I have supported students through individualized guidance, exam review, and structured instruction, while managing large volumes of work with accuracy and attention to detail. These experiences have reinforced my ability to balance multiple responsibilities, maintain documentation, and communicate clearly with different audiences, all of which are essential in accounting and finance operations.

I am especially interested in Hoosier Energy because the role combines financial analysis, reporting, and operational support in a setting that values accuracy, accountability, and long-term service. I am excited by the opportunity to contribute to a team that supports both accounting and finance functions while learning the utility industry and building a foundation in regulated financial operations. My quantitative training, analytical mindset, and commitment to learning position me well to contribute meaningfully to your team.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background in data analysis, reporting, and problem solving could support Hoosier Energy's finance and accounting functions. I look forward to the possibility of speaking with you.

Sincerely,

Nahid Hasan Sagar
