PROFESSIONAL SUMMARY

Master's candidate in Statistical Science at Indiana University Bloomington with a strong quantitative foundation in data analysis, reporting, and decision support. Skilled in Excel-based financial analysis, trend review, reconciliation support, and communicating results clearly to technical and non-technical audiences. Experienced in benchmarking, validating data quality, and building reproducible analytical workflows using Python, R, and SQL. Interested in supporting accounting and finance operations in a regulated, service-oriented environment such as Hoosier Energy.

EDUCATION

Indiana University, College of Arts and Sciences

Master of Science in Statistical Science

Bloomington, IN

Expected May 2027

Relevant Coursework: Statistical Consulting; Applied Statistical Computing; Applied Linear Models; Fundamentals of Statistics; Introduction to Analysis

University of Dhaka

Bachelor of Science in Physics

Dhaka, Bangladesh

August 2024

EXPERIENCE

Research Assistant, StatMIND Lab

Indiana University Bloomington

2025 – Present

Bloomington, IN

- Built and validated computational routines for high-dimensional data analysis, improving efficiency and reproducibility of statistical workflows used in research settings.
- Developed benchmarking procedures to compare runtime, scalability, and output consistency across implementations, supporting evidence-based analysis and performance evaluation.
- Analyzed large, complex datasets to identify patterns, validate model outputs, and summarize findings for technical stakeholders.
- Maintained detailed documentation and testing procedures to support data integrity, traceability, and reliable reporting.

Teaching Assistant, Department of Statistics

Indiana University Bloomington

2025 – Present

Bloomington, IN

- Support undergraduate statistics courses through classroom instruction, grading, and individualized student guidance.
- Evaluate assignments and provide constructive feedback on analytical reasoning, interpretation, and quantitative problem solving.
- Hold office hours and exam review sessions to strengthen students' understanding of statistical methods and reasoning.

Senior Mathematics Instructor

Udvash Academic & Admission Care

2016 – 2025

Dhaka, Bangladesh

- Taught and mentored more than 100,000 students through structured instruction, comparative analysis, and targeted academic planning.
- Designed practice materials and review frameworks to improve performance tracking, problem solving, and concept retention across large student groups.
- Translated complex quantitative concepts into clear, actionable explanations for students with varied academic backgrounds.

TECHNICAL SKILLS

Accounting & Finance Support: Excel, reconciliation support, variance analysis, trend analysis, data validation, financial statement review, reporting

Analytics Tools: Microsoft Excel, Python, R, SQL, Git, LaTeX, Jupyter, PowerPoint

Core Strengths: attention to detail, problem solving, communication, organization, time management, documentation, teamwork

SELECTED PROJECTS

Time-Series Analysis Using Bayesian Additive Regression Trees

Indiana University Bloomington

R, Bayesian Modeling

2025 – Present

- Conduct thesis research on Bayesian tree-based methods for time-series analysis, emphasizing model interpretation, validation, and performance assessment.

Ordinary Least Squares from Scratch

Independent Project

Python, NumPy, Pandas, Matplotlib

2025

- Built a transparent implementation of regression estimation from first principles, reinforcing matrix operations, data interpretation, and model diagnostics.
