William Blair Investment Banking Recruiting Team
Chicago, IL

Dear Hiring Committee,

I am writing to express my interest in the 2027 Investment Banking Full-Time Analyst position at William Blair. I am currently pursuing an M.S. in Statistical Science at Indiana University Bloomington (expected May 2027), and I am excited about the opportunity to apply rigorous quantitative analysis, clear communication, and a strong client-service mindset to your investment banking team.

In my role as a Research Assistant in the StatMIND Lab, I perform in-depth analyses on complex datasets, build and validate statistical models, and communicate results to support high-impact decisions. I implemented core Bayesian routines in C++ with Rcpp and RcppArmadillo, reproduced benchmark outputs from original R implementations, and developed quality-control workflows using unit testing and runtime benchmarking. This work strengthened my ability to evaluate assumptions, test multiple analytical approaches, document methodology, and deliver accurate results under tight deadlines, skills that align directly with financial modeling and transaction execution demands.

Beyond technical analysis, I have developed strong communication and execution discipline through teaching and mentoring roles. As a Teaching Assistant in the Department of Statistics, I evaluate large volumes of analytical work with careful attention to detail and explain quantitative reasoning to diverse audiences. As a longtime instructor, I have mentored large student cohorts and built concise, structured presentations to translate complex content into actionable insight. These experiences prepared me to contribute effectively in client meetings, drafting sessions, and internal team collaboration.

I am especially drawn to William Blair's reputation as a premier global boutique and its focus on delivering independent, high-quality advice to clients. I am eager to contribute to valuation work, due diligence, and presentation development while continuing to learn from senior bankers and investing in the development of future analyst classes and interns.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my quantitative background, analytical rigor, and work ethic can support William Blair's Investment Banking team.

Sincerely,

Nahid Hasan Sagar
